

Lee Kau Yan Memorial School: Implanting Technology into Education via AVCON Distance Learning Solution

Lee Kau Yan Memorial School, which established in 1964, has aimed at living the spirit of Gospel and nurturing an all-round development of students, so that they are able to contribute to our country.

The school has flexibly advanced technology in education for recent years. By implanting technology into learning, the interaction among students and teachers is facilitated.

In fulfilling the goal of all-round education, the school had started to rent user client of distance learning system from V-China for three years, so as to advance Multi-schools Learning Coordination. Under the system, local students were able to share their culture with the students from Southeast Asia (e.g. Malaysia and Foshan) easily via the system without travel.

Challenge

Lee Kau Yan Memorial School is a pioneer of distance learning in local educational field, as it has held numerous distance learning programs over the years.

However, the school must borrow the user client of the system from V-China before holding related activities. Besides, the school could only act as the attendee under the system and without any right to control the events. If there was disconnection, the school needed to contact with V-China so as to re-login to the system. It was quite inconvenient for them.

Therefore, the school would like to seek a solution with administrators' rights in order to enhance the effectiveness of distance learning program.

Solution

Over the years of the experience about distance learning program, the school has already set up basic hardware, including LCD TV, camera, microphone and other AV equipments.

Therefore, the school selected ICT Technologies and Services Limited as the solution provider and adopted AVCON Software-based Distance Learning Solution with four user clients, in order to be the administrator of the system to hold the learning program.

The video of AVCON distance learning system is smooth and clear.

AVCON Distance Learning Solution

Advantages

- Enhance Learning Efficiency
- Facilitate Exchange Program
- Widen Students' Horizon
- Easy to Operate

The teachers from Lee Kau Yan Memorial School discussed the joint-schools learning program via AVCON distance learning system.

Benefit

Mr. Lo, IT teacher from Lee Kau Yan Memorial School pointed out, "People usually misunderstand distance learning system that there must be complicated tasks of cabling and configuration for system deployment. In fact, it is very easy for set-up by installing the software. He said, "we could even hold the distance learning activity via this system in campus garden with power source and LAN port". Easy to use was one of the advantages of AVCON software-based distance learning solution. The school was able to adopt it simply by installing the software and basic AV equipments, instead of investing in the expensive terminals.
